Understanding the comprehensive nature of these standards is essential for anyone involved in the recruitment, onboarding, or ongoing employment within Saudi Aramco projects.

Overview of Saudi Aramco Medical Standards

Saudi Aramco's minimum medical standards serve as a benchmark for evaluating an individual's health status to ensure they are fit for work in demanding environments such as oil fields, refining plants, and offshore platforms. These standards are aligned with international health and safety regulations, tailored to the unique operational needs of Saudi Aramco, and are regularly updated to incorporate advances in medical science and safety protocols.

Core Components of the Medical Standards

The Saudi Aramco minimum medical standard requirements encompass a broad spectrum of health assessments, laboratory tests, and examinations. These components collectively determine an individual's medical fitness for employment.

1. Medical History and Physical Examination

A thorough review of personal medical history is conducted to identify any pre-existing conditions that could impact job performance or safety. The physical exam typically includes:

- Vital signs assessment (blood pressure, pulse, temperature, respiratory rate)
- General physical assessment

- Review of immunization history

2. Laboratory and Diagnostic Tests

To complement the physical examination, several laboratory tests are mandatory:

- No communicable diseases

2. Field and Offshore Workers

Due to the physically demanding and high-risk nature of their work, standards are stricter:

- No significant cardiovascular or respiratory conditions
- Good physical fitness and stamina
- Ability to work in confined or remote environments
- Additional tests like stress tests or pulmonary function tests if needed

3. Engineers and Technical Staff

Require comprehensive health assessments similar to office staff but with added emphasis on:

- Musculoskeletal health
- Vision and hearing acuity

4. Medical and Safety Personnel

Must meet higher standards of physical and mental fitness, including:

- No history of mental health conditions that could impair judgment
- Good physical health to perform rescue or emergency procedures

Process for Medical Clearance
